SAFETY VALVE TEST BENCH

NAG-SV50

Safety Valve Test Bench is a very easy, safe, accurate and **maintenance free** operating work shop test unit for Testing & Calibration of pressure/safety relief valve (spring operated) in the range of 0.5" to 8" (DN – 15 to 200 mm) according to the common international test standards.

Safety Valve Test Bench is designed to provide the operator with a maximum of easiness to calibrate the valves accurately.

As standard manufacture, the four way manual sliding clamps allow an appreciable gain of time but, on option, pneumatic or hydraulic Machined body/nozzle casting can be fitted on bench.

Unique - 4 claw clamping system, specially designed for quickly clamping all common types and sizes of safety valve **up to 8"**. The specific configuration of the piping, fitting, and control ensure an strong and dynamic lift reaction and accurate test result, high quality, stainless steel gauges measure and display in pressure in kg/cm² (g).
